DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 4, 31, 35 and 37 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant's specification fails to teach that the composition is non-herbicidal. The recitation of a negative limitation in the claims, which is not found in the specification constitutes new matter (Ex parte Graselli 231 USPQ 393).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 6 and 36 are rejected under 35 U.S.C. 102(e) as being anticipated by Sixl (6479432).

Sixl teaches a composition which comprises mineral oil, methyl esters of rapeseed oil, and an anionic dodecylbenzene sulfonate salt, which is a wetting agent (see Table 2, compositions 2/4 and 2/3 and definitions in column 17, lines 1-30). The composition also contains Bentone 38, which is a hectorite clay, which would act as a viscosifier and a weighting agent. The Genapol is an alcohol or hydroalcohol as in claim 6. Applicant's intended use as an emulsion breaker does not distinguish (In re Pearson 181 USPQ 641).

3. Claims 3, 5, 7, 11, 12, 14-16, 18-21, 23-27, 29, 32 and 33 are allowable over the art of record.

4. Applicant's amendment and arguments have been considered but are not deemed fully persuasive. The rejection over Starch is withdrawn in view of applicant's amendment to include a weighting agent.

5. With respect to Sixl, the presence of a terminal hydroxyl group on the GENAPOL compounds would constitute the compounds being an alcohol. Numerous alcohols are multifunctional in nature, being at least both a solvent and surfactant. Applicant's claim does not contain any specifics which would preclude the GENAPOL compounds from acting as solvents. Furthermore, the claims fail to teach what the solvents makes soluble. Also it is well established that the mere reason for adding one component to

Art Unit: 1712

another is not a patentable difference (In re Lindner 173 USPQ 356). Sixl further teaches that up to 30% water may be added to the composition (column 3, lines 48-55). The use of the term hydroalcoholic mixture is thus not seen as distinguishing, since such water would be in admixture with the GENAPOL. With respect to claims 4 and 31, the addition of non-herbicide adds new matter to the claims, since such limitation was not found in the specification as originally filed.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
